

Intelligent Design

HOME: Best specialty furniture

If you like design, if you like furniture, or if you just want to visit a cool place, Intelligent Design is it. There may be no other place in America quite like it. If you have been to Starbucks, you have seen their work. Intelligent Design has also supported Disney, Nike and the Seattle Library. Old Navy is now remodeling with concepts from Intelligent Design. With the opening of an Intelligent Design retail outlet in Portland, homeowners can now take advantage of this wealth of design expertise. Intelligent Design stocks products from some of the best home furnishings manufacturers in the world, with names such as Fritz Hansen, Casa Milano, Arper and Moooi, to cite but a few. Prices begin in the midrange, and a large selection of pre-owned office furniture is also available. Whether it is wood furnishings from Germany, modern design from all over Europe or custom designs and colors, Intelligent Design can do it all. Portland is a hotbed for designers because of Nike,

Adidas, Columbia Sportswear and other businesses that require design work. Under President William Fritts, Intelligent Design has been able to tap into the local design talent to create a destination place you will want to visit.
